PERSONAL STATEMENT

I am a Full Stack Developer with over three years of hands-on experience in web and mobile application development. My undergraduate studies in Computer Application at Veda College (Tribhuvan University) provided a strong theoretical foundation in software engineering, networking, and database systems, which I have actively applied in professional settings.

My previous role at Doppler Trade Pvt Ltd, where I developed and maintained an ISP platform with FreeRADIUS authentication and Ubuntu VPS infrastructure, has deepened my understanding of real-world system architecture and server administration.

EDUCATION

Bachelor of Computer Application (BCA)

Veda College, Tribhuvan University, Kathmandu, Nepal | 2020 – 2025 | GPA: 3.33 / 4.0

- Relevant modules: Data Structures & Algorithms, Object-Oriented Programming, Web Technologies, Database Management Systems, Software Engineering, Computer Networks, Operating Systems, Mathematics for Computing.
- Final Year Project (Project II): PizzBizz — a cross-platform mobile application built with Flutter and Firebase, featuring real-time data handling, eSewa payment gateway integration, and social sharing functionality. (6 months, 2024)
- Project I: FlexiHire — a full-stack job board web platform built with React.js and Firebase, featuring role-based access control and a responsive UI. (6 months, 2022–2023)

Higher Secondary Certificate — Science Stream (+2 / NEB)

Milestone International College, Kathmandu, Nepal | 2017 – 2019

RELEVANT PROFESSIONAL EXPERIENCE

Full Stack Developer

Doppler Trade Pvt Ltd, Kathmandu | Jan 2025 – May 2026

- Designing and maintaining an ISP hotspot voucher platform, managing the full development lifecycle from requirements to deployment.
- Implementing FreeRADIUS authentication integrated with router systems configured via Winbox — applying networking principles studied during BCA in a live commercial environment.
- Administering a Ubuntu VPS using aaPanel, gaining practical experience in server configuration, NGINX, domain management, and database optimisation.
- Applying software engineering practices including version control (Git), modular code structure, and iterative UI improvement based on user feedback.

IT Support Intern

Veda College, Kathmandu | Jan 2022 – Dec 2024

- Supported installation and configuration of academic software across college systems.
- Assisted faculty and students with technical issues, developing strong problem-solving and communication skills.

TECHNICAL SKILLS & KNOWLEDGE AREAS

Programming Languages: JavaScript, Dart, Python, HTML5, CSS3

Frameworks & Libraries: React.js, Flutter, .NET API

Databases: Firebase Firestore, MySQL, real-time data handling

Server & Networking: Ubuntu Linux, VPS (aaPanel), NGINX, FreeRADIUS, TCP/IP, router configuration (Winbox)

Tools & Platforms: Git, GitHub, Google Firebase Console, eSewa Payment Gateway

Academic areas of interest: Cloud computing, distributed systems, software architecture, machine learning fundamentals, cybersecurity

ACADEMIC PROJECTS

PizzBizz — BCA Final Year Project II

Flutter, Firebase, Dart, eSewa | 6 months, 2024

- Designed and built a cross-platform mobile application combining pizza customisation with a social engagement feed.
- Integrated Firebase Authentication, Firestore real-time database, and Firebase Storage for media uploads.
- Implemented eSewa payment gateway for live in-app transactions — a commercially relevant integration rarely seen in academic projects.
- Managed the full project lifecycle: requirements gathering, UI wireframing, development, testing, and final presentation.

FlexiHire — BCA Project I

React.js, Firebase, JavaScript | 6 months, 2022–2023

- Developed a hiring platform with job listings, applicant profiles, and role-based access for employers and candidates.
- Led front-end and back-end development, managing timelines and coordinating with team members.
- Focused on responsive design and iterative UX improvement based on peer feedback.

ADDITIONAL INFORMATION

English proficiency: Advanced

Career goal: To progress into a senior full-stack or systems architect role

GitHub portfolio: github.com/AxelXrest — active repositories demonstrating practical coding projects.
